

Earth Stool 74 cm

FSC certified wood, beer or coffee waste mixed with upcycled industrial plastic

Earth Stool is the result of a new innovative waste-to-value technique that enables Mater to reuse companies' industrial waste. It comes in three variants, 'Oak Wood' with a seat made from FSC Certified Oak wood, 'Mask Edition' made from spent grain fibres from Carlsberg's beer brewing process or 'Coffee Edition' made from coffee bean shells from BKI Coffee's roasting process mixed with upcycled plastic waste from Novo Nordisk' insulin pen production. Durable for both private and public use.
